

## Half of Tomorrow - a Novel by Joseph Costa

Introduction to Half of Tomorrow - Books One & Two

There are two "Half of Tomorrow" novels.

The first, Book One, was written in the 1960s. I sold it to publishers twice but did not print because publishers wanted to change the president's character. I refused.

The story is the prediction of the economics of the USA failing and resulting in the total destruction to cities like Los Angeles and San Francisco and the deaths of thousands - a precursor of 2012. A disaster that today in 2009 & 2010 can happen - how and why many today fear economic disaster is inevitable.

Watch for "Book Two - Coming Soon. Now in Writing". This will change the Book One prediction to a solution (desired).

Half of Tomorrow Book Two is a rewrite of the economic disaster and how we (you and I) can change the horrible disaster of Book One so the millions do not die and today's economic problems are cleared. Book Two is a planned attempt by Jesus and Masters writing with me at this time to change and prevent the Book One disaster from occurring.

This effort is based on the Inner World Wisdom of how the future can be rewritten and happen through psychic influences on karma-based events. Simply stated the future that is already set in motion can be changed psychically to avoid karmic disaster that was set in motion by human negative behavior of the past related to money \$.

In this way the negatives that created the coming economic disaster can be changed, healed. You, the reader, are asked to add your psychic energies to saving the United States from reaping disaster put upon us by greedy people of the past - thereby giving cause to our having a balanced economy and peaceful changes in the coming "2012 World Shift."

Tell your friends to tell their friends to support this unique way to fix what is not working in the World economy and ours / yours.

All funds from this experiment go toward finding more World Healers.

From One World Healer to Another
